

We help farmers and land owners make additional revenue from low productivity land. We help them to strengthen cashflows and improve asset values.

PLANTING SUBSIDIES

Leave us to do the hard work in applying for planting grants, based on exotic or native species including fencing costs for land over one hectare.

FREE CARBON REVENUE

Let us take the hassle out of dealing with the carbon credit scheme, for forest species that grow to over five metres, covering more than 30 percent of more than one hectare.

FOREST SALES incl land

We have buyer lists in all regions. If you are a smaller scale forest we can club your trees with others for better harvest economics.

We charge two per cent on completed transactions. No deal, no fee.

Email help@forestx.com with your block's address and your contact phone number, or call either Graham on 0274410353 or Kim on 0222426288.

Our clients trust us to help them get best land use. Our national network works alongside them where forestry can make a contribution, optimising returns and strengthening cashflows. They trust us because our work is based on specialist knowledge, practical experience and independence.
